Subject: RE: Tower Standard Monthly Technical Call

FYI – I added Anthony Greenwater to this e-mail chain.

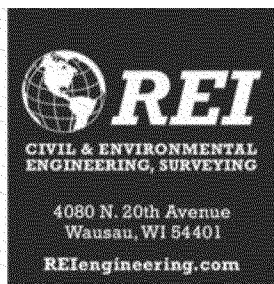

I feel that I am beating a dead horse on this but – with the current PECFA deadlines looming and no other reported source of funding currently available, time is running out to take advantage of PECFA funding. To comply with current PECFA requirements the site work should be completed by end of 2019. Please also understand that this is just one of many sites that REI is tasked with completing prior to the end of PECFA. From REI's perspective this project has been stalled for months with no clear direction to move it forward. Our Clients, Bill and Linda Kozak, have made it very clear that they want the site closed as soon as possible because they intend to sell the property.

The degree and extent of the contaminant source appears to be sufficiently defined to allow remedial strategies to be discussed with the goal of selecting an option in the very near future. REI would like the opportunity to discuss potential remedial options with the group next week, with the goal of documenting remedial options that are acceptable to the group, as well as documenting remedial options that are not acceptable. Previously mentioned remedial strategies included air sparge with soil vapor extraction and/or soil excavation. If anyone has other options, or has a more refined air sparge with soil vapor extraction and/or soil excavation option feel free to pass them along to the group before next week's call.

Thank you,

David N. Larsen P.G

Subject: RE: Tower Standard Monthly Technical Call

Good Morning:

This is a reminder that we have a call scheduled for next Thursday morning at 8 AM. In terms of agenda items, I will try to spend some time next week reviewing existing investigation data for the purposes of providing comments on the monitoring well locations proposed by EPA on April 26. If you have other topics for discussion, please share with the group by Wednesday, May 24.

Thanks!

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
